# **Professional Summary**

Data Analyst with experience in **Python**, **SQL**, **Tableau**, **Power BI**, and **Excel**. Skilled in data cleaning, analysis, and creating reports and dashboards. Experienced in building ETL processes and working with large datasets to support decision-making and improve business performance.

## **Core Skills**

- Data Analysis & Visualization: Python (Pandas, NumPy, SciPy, Matplotlib), SQL (SQL Server, MySQL), Tableau, Power BI, Excel (VLOOKUP, Pivot Tables),
- Data Cleansing & Preprocessing: Data wrangling, Missing Data Imputation, Duplicate Removal, Text Analysis.
- Statistical Methods: Time Series Analysis, Regression, Clustering, Predictive Modeling.
- Business Intelligence & Reporting: Power BI, Tableau, Data Modelling, Reporting Automation.
- Problem Solving & Critical Thinking: Creative Data Solutions, Analytical Reasoning
- Database Management: SQL Server, MySQL
- Additional Tools: DAX, Power Query, ETL processes (Extract, Transform, Load)

# **Projects**

### **UNITED STATES' CENSUS DATA**

- Analyzed U.S. Census data (2010-2015) for demographic trends, handling a dataset of over 300,000 records using Python (Pandas, NumPy) for data cleaning, transformation, and analysis.
- **Identified** key population growth patterns and regional demographic shifts, providing actionable insights into migration and urbanization.
- Visualized findings using Matplotlib, producing a professional report summarizing key insights.

#### **NEWYORK TAXI TRIPS DASHBOARD**

- Developed a Power BI dashboard to visualize and analyze 28 million taxi trips between 2017-2020, covering 265 locations across New York City
- Processed and cleaned data using DAX and Power Query, improving data accuracy by 30% and ensuring the integrity of trip records.
- **Uncovered insights** on peak travel hours, average trip lengths, and revenue generation, helping the client optimize their fleet management and staffing decisions.

#### **MATERNAL HEALTH RISK ANALYSIS**

- Analyzed 50,000+ records from 15+ hospitals and clinics to identify risk factors in maternal health using Tableau.
- Discovered key correlations between maternal conditions and health risks, improving predictive accuracy by 20% for health complications during pregnancy.
- Created an **interactive Tableau dashboard**, providing **real-time insights** that helped healthcare professionals optimize **resource allocation** and **decision-making** for high-risk pregnancies

# **Work Experience**

Junior Data Analyst - Quantum Analytics - Nigeria July 2023 - present

- **Designed and launched 30+ interactive dashboards** using **Tableau** and **Power BI**, enabling real-time insights for stakeholders and improving data-driven decision-making across the business.
- Extracted, cleaned, and analyzed data from SQL databases (AdventureWorks) to improve insights into sales, customers, and product data, reducing data processing time by 15%.
- Enhanced reporting accuracy by 25% through data validation techniques, ensuring more reliable and actionable business reports.
- **Developed and deployed predictive models** for sales and revenue forecasting, achieving **85% accuracy**, allowing for better strategic planning and resource allocation.
- Collaborated with cross-functional teams to design and implement data pipelines that streamlined data extraction and processing, improving operational efficiency by 30%
- Transformed raw data into actionable insights, presenting findings to stakeholders in an intuitive and easy-to-understand format.

## **Education**

#### **BACHELOR OF SCIENCE IN PHYSIOLOGY**

Delta State University, Abraka, Delta State, Nigeria.

- Graduated with Second Class honors Upper Division
- C.G.P.A: 3.4/4.0

## Certification

- MICROSOFT CERTIFIED: POWER BI DATA ANALYST ASSOCIATE Microsoft.
- DATA ANALYSIS CERTIFICATE OF COMPLETETION Quantum Analytics NG.
